Andersen® 400 Series Windows (Standard)

- **White or Optional clear Pine interior**
- **Screens & “Snap-In” Grills are standard**
- **Six exterior optional colors**
- **Energy efficient**
- **Dual-layer, compressible bulb weather-stripping seals out dust, wind and water**

Tilt-Wash Double Hung

Double-hung windows have two sash in a single frame which slide up or down to provide ventilation. Because their sash remain flush with the wall while the window is open, they are a good choice for placement adjacent to patios, decks and walkways. Our best-selling double-hung window, the Andersen® 400 Series tilt-wash double-hung window is extremely energy efficient and gives you a wide array of decorative and performance options, including Stormwatch® protection.

Bow Window

Bow windows are window combinations that curve gradually and gracefully outside a home. These dramatic combinations can add space, volume and light to a room and add more personality to any home—inside and out. Andersen® 400 Series bow window units utilize all of the individual qualities of our casement windows.

Angle Bay

Bay windows are window combinations that project outward from a home. These dramatic combinations can add space, volume and light to a room and add more personality to any home—inside and out. Andersen® 400 Series tilt-wash double-hung bay windows are extremely energy efficient and give you a wide array of decorative and performance options.

Casement Windows

Casement windows are hinged on the side and open outward to the left or right, allowing you to catch breezes and direct the flow of fresh air into your home. Usually taller than they are wide, their entire sash opens to provide top-to-bottom ventilation. This also makes them a frequent choice for use as egress windows—ones that can be used as an emergency exit.

Andersen® 400 Series casement windows start with a design that is extremely energy efficient. Add to that a solid-wood sash covered inside and out by low maintenance Perma-Shield® cladding to protect against water damage. It's easy to see why they have become our best-selling casement window of all time.

Awning Windows

Awning windows are hinged at the top and open outward. Usually wider than they are tall, their entire sash opens to provide full side-to-side ventilation, allowing them to catch breezes from any direction. They are often used above, below or alongside stationary windows to provide ventilation because, when open, their sash can function like a roof, providing a measure of shelter from light rain.

Andersen® 400 Series awning windows start with a design that is extremely energy efficient. Add to that a solid-wood sash covered inside and out by low maintenance Perma-Shield® cladding to protect against water damage. Then give them rich, natural pine interiors for windows that are as beautiful as they are functional and reliable.

Picture Windows

Andersen® 400 Series complementary picture windows are rectangular and stationary (non-opening) windows characterized by their dramatic sizes. They can be used to provide singular points of light and architectural accents, or combined to create a signature statement

Circle Top Windows

Andersen® 400 Series curved specialty windows are stationary (non-opening) windows characterized by their curved shapes. They can be used to provide singular points of light and delicate architectural accents, or combined to create a signature statement.

Oval Windows

Andersen® 400 Series circle and oval specialty windows are stationary (non-opening) windows characterized by their special shapes. They can be used to provide singular points of light and delicate architectural accents, to create a signature statement.

AFFW606 Curved Specialty Window

Andersen® 400 Series complementary curved specialty windows are stationary (non-opening) windows characterized by their curved shapes. They can be used to provide singular points of light and delicate architectural accents, or combined to create a signature statement.

Andersen 200® Series Windows (Optional)

- **White or optional pine interior**
- **“Grills between glass” and screens are standard**
- **Available in best-selling sizes with most popular options**
- **Low-maintenance Perma-Shield® exteriors**

Double Hung Window

Double-hung windows have two sash in a single frame which slide up or down to provide ventilation. Because their sash remain flush with the wall while the window is open, they are a good choice for walls adjacent to patios, decks and walkways.

The Andersen® 200 Series tilt-wash double-hung windows feature low maintenance Perma-Shield® exteriors along with clear pine interiors to bring the warmth of natural wood into your home. Or, if you prefer, choose a factory-painted white interior with an ultra-smooth low maintenance finish. Either way, they come in our most popular sizes and give you our most requested options, along with our renowned Owner-2-Owner® warranty.

Picture Windows

Picture windows are stationary, non-opening windows that allow light into the room. Andersen® 200 Series picture windows come with low-maintenance exteriors and real wood or prefinished white interiors along with the security of our renowned Owner-2-Owner® warranty.

Circle Top Windows

Specialty windows are stationary windows characterized by their curved shapes. Andersen® 200 Series specialty windows are half-circle windows that can be used along with our double-hung windows to make a signature statement in your home and provide a delicate lighting accent.

Bath Fans

Broan® A70L (Standard)

MODELS A50L, A70L INVENT™ SERIES FAN / LIGHTS

DESCRIPTION

BLOWER:

- Plug-in, permanently lubricated motor - engineered for continuous operation
- Dynamically balanced centrifugal blower wheel for quiet, efficient performance
- Low RPM for quiet operation

HOUSING:

- Rugged, 26 gauge, galvanized steel construction
- Polymeric, 4" duct connector with tapered sleeve and no metallic clatter
- 5-3/4" height allows for 2" x 6" ceiling installations
- Sturdy, easy, four-point mounting directly to joist
- Can be mounted in ceilings up to 7/12 pitch

GRILLE:

- Polymeric construction
- Innovative design - the result of extensive research with designers and consumers
- 100W max. incandescent A19 type bulb or energy efficient equivalent bulb with Maximum Overall Length (M.O.L.) of 4.4" or less (bulb not included)
- Durable steel reflector with white enamel finish

CONTROLS (Purchase separately):

- Refer to Broan's catalog for a complete line of accessories to effectively adapt these fans to your construction requirements.

U.L. Listed for use over bathtubs and showers when connected to a GFCI protected branch circuit (ceiling mount only).

U.L. Listed for use in insulated ceilings (TYPE I.C.)

1-Year Warranty

TYPICAL SPECIFICATION

Fan / Light shall be Broan Model A50L (A70L).

Fan / Light shall have corrosion resistant galvanized steel housing with four-point mounting capability. It shall be ducted to a roof or wall cap using 4" round ductwork.

Blower assembly shall be removable, have a centrifugal-type blower wheel and a permanently lubricated motor designed for continuous operation.

Non-metallic damper/duct connector shall be included.

Bulb shall be 100W max. A19 type incandescent or energy efficient equivalent bulb with Maximum Overall Length (M.O.L.) of 4.4" or less (bulbs not included).

Air delivery shall be no less than the airflow values and no greater than the sound level values listed in the HVI Performance Specifications provided in this specification (see following chart). All air and sound ratings shall be certified by HVI.

Ceiling Ventilator shall be U.L. Listed for use in insulated ceilings (Type I.C.) and for use over bathtubs and showers when connected to a GFCI protected branch circuit.

WhisperFit® EZ

VENTILATION FAN

Specification Submittal Data / Panasonic Ventilation Fan/Light

Description:

Ventilating fan/light shall be low sone ceiling mount rated for continuous operation. Fan shall be ENERGY STAR® rated and certified by the Home Ventilating Institute (HVI). Evaluated by the Underwriters Laboratories and conform to both UL and cUL standards.

Motor/Blower:

- Four-pole totally enclosed condenser AC motor rated for continuous use.
- Fan ventilation rates shall be manually adjustable for 80 or 110 CFM.
- Power Rating shall be 120 volts and 60 Hz.
- Fan shall be UL and cUL listed for tub/shower enclosure when GFCI protected.
- Motor equipped with thermal cutoff fuse.
- Removable, permanently lubricated, plug-in motor.

Housing:

- Rust proof epoxy and polyester resin coating, 26 gauge galvanized steel body.
- 4" diameter duct with optional 3" adapter included.
- Built in backdraft damper.
- Articulating and expandable extension bracket up to 24".

Grille:

- Attractive design using Poly Pro material.
- Attaches directly to housing with torsion springs.

Light:

- Two 13 Watt self-ballasted GU24 base compact fluorescent lamps included.
- One 4-Watt night-light included.
- FCC Part 18 compliant.

Warranty:

- ALL Parts: 3 years original purchase date.
- CFL: 3 years. Night Light: No Warranty.

Architectural Specifications:

Ventilation fan and light shall be ceiling mount, ENERGY STAR® rated with built-in speed selector. Select from 80/110 CFM and no more than 0.4/1.0 sone as certified by the Home Ventilating Institute (HVI) at 0.1 w.g. with no less than 72/102 CFM and no more than 0.7/1.3 sone as certified by HVI at 0.25 w.g. Power Consumption shall be no greater than 20.9/26.6 watts at 0.1 w.g. and 20.5/26.5 watts at 0.25 w.g. with efficiency of no less than 3.8/4.2 CFM/watt at 0.1 w.g. and 3.5/3.9 CFM/watt at 0.25 w.g. The motor shall be fully enclosed, four pole condenser type engineered to operate continuously for no less than 30,000 hours. Power rating shall be 120v/60Hz. Housing material shall be no less than 26 gauge galvanized steel with rust proof epoxy and polyester resin coating. Duct diameter shall be no less than 4" (3" if using the included duct adapter). Fan shall be UL and cUL listed for tub shower enclosure when GFCI protected. Fan can be used to comply with ASHRAE 62.2, LEED, ENERGY STAR® IAP, EarthCraft, California Title-24 and WA Ventilation Code. Lamps shall be of the compact fluorescent type with the fan utilizing no less than two 13W ENERGY STAR® rated self ballasted GU24 base compact fluorescent lamps, 3500 Kelvin, >80 CRI/998 Lumens per lamp/75 Lumens Per Watt/10,000 hours rated average life. Night-light feature shall be included.
